Drinking Water

INTERNAL SEALING SYSTEM FOR PIPE JOINT LEAKS

HydraTite is a mechanical solution comprised of an EPDM rubber seal that is locked in place with stainless steel retaining bands.

- LOW PROFILE
- HIGHLY CUSTOMIZABLE
- RAPID RETURN TO SERVICE
- NONCORROSIVE
- NSF/ANSI 61

Our seal has an extensive record of successfully eliminating leaks in potable water lines. HydraTite is recognized by AWWA and is included in M28 & the soon-to-be-published M8.
