- Low profile ensures minimal flow loss
- Recognized repair technique - AWWA M28
- NSF/ANSI 61 Certified for drinking water

INTERNAL JOINT SEALING SYSTEM

HydraTite® seals are custom made for each project. Seals provide a low cost option for the repair of leaking joints, with projects normally completed in days, not weeks! Superior quality and intricate design assures a tight, leak free seal. By eliminating the need for excavation, savings can be in excess of 50%. The HydraTite Sealing System serves as an internal joint seal and can be transformed into an interlocking sleeve system, custom designed to fit any length of pipe.

Prep Joint

Expand Bands with Expander

Position Seal

Insert Wedges

Install Rubber Seal

Pressure Test Seal

Install Retaining Bands

Check for Leaks
