

Stop Leaks in Box Culverts

Square shaped culvert
underwater repair.

Internal Pipe Joint Repair Solution

for Box Culverts, Tunnels
& Similar Applications

- Customized mechanical remediation with NO EXCAVATION REQUIRED!
- Conforms to square and oval culverts.
- Seal flexibility accommodates shifting, vibration, ground settling and thermal expansion/contraction.
- Low profile ensures minimal pressure drop.
- NSF/ANSI 61 Certified for drinking water

INTERNAL JOINT SEALING SYSTEM

HydraTite® seals are custom made for each project. Seals provide a low cost option for the repair of leaking joints, with projects normally completed in days, not weeks! Superior quality and intricate design assures a tight, leak free seal. By eliminating the need for excavation, savings can be in excess of 50%. The HydraTite Sealing System can be designed to accommodate box culverts, tunnels and similar shapes to mechanically seal challenging joint leaks, and preserve the owner assets long term and leak free.

Unique Shaped Joint Repairs
